

VORTEX™

Without doubt the most intelligently designed robots.

VORTEX 1™

The most compact.

“ DID YOU KNOW? ”

Patented Vortex effect
INNOVATION

The position of the motor makes the difference.

By inclining the position of the pump motor and the suction flow, the engineers have succeeded in creating the first patented pool robot featuring Vortex technology. **The Vortex effect creates a super powerful swirl inside the filter.** The pieces of debris are kept in suspension in the water, which prevents clogging.

- ▶ **RESULT: powerful and constant suction efficiency throughout the cleaning cycle, 30% more powerful than a "classical" robot.**

The inclination of the motor makes the difference

Why opt for the Vortex™ 1 electric pool cleaners?

This robot benefits from **Vortex technology** that guarantees **constant and powerful suction capacity** throughout the cleaning cycle. Its small size enables it to reach the more difficult zones, **offering an impeccable cleaning result**. Lightweight and compact, it is easy to handle and to store.

► **Focused on pool users' needs, Zodiac has developed the Vortex™ 1: a compact robot that is easy-to-use and offers optimal suction power.**

Performance at its best!

VORTEX TECHNOLOGY

The first pool robot boasting patented Vortex technology for constant maximum efficiency:

- powerful cyclonic suction
- no loss in suction capacity

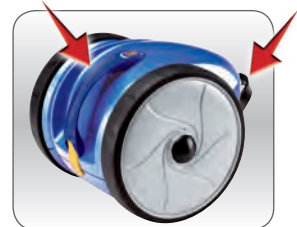

You'll love its ease of use!

Minimum size, minimum weight for easy handling and storage

Hygienic and easy to clean filter compartment

2 user-friendly handles for easy carrying

It boasts all the technical features of a larger model!

- For in-ground and above-ground pools with rigid walls. Dimensions up to 10 x 5 m
- All shapes, all types of bottoms and surfaces

- Cleans bottom and walls
- 1 cleaning cycle: 2hrs
- Weight: 6 kg

TESTED & APPROVED!

30%

lighter than the average electric cleaning robot, **Vortex™ 1 only weighs 6 kg**. A real advantage for users looking for **efficiency and practicality**.

50%

less power consumption: Vortex™ 1 is the **most economical** electric robot in its category.

ELECTRIC POOL CLEANER
